

Max O. Peer review 2 of BrendenFerkans project

Quality of Work: 3/3 – The code and application look correct and organized. Also, the readme file gives a good update on the project and explains what the application does and look like very nicely. I also enjoyed the little easter egg of Ryan Reynolds, it gave me a nice laugh. Keep up the good work and can't wait to see the finished product.

Progress of Project: 3/3 – So I think that this is a cool project because it is very applicable to what a computer scientist may be doing in the work world. The application looks pleasing and seems to work nicely. I would just continue to work on the logging in portion of the project so that that feature works as intended.

Video: 3/3 – The video does a good job explaining the project and I liked how they showed all there progress so far. It is coming along nicely.
